### Care and Cleaning Instructions:

For easy cleaning of recent soiling, promptly wash with a mild soap solution. For a previously soiled area that has not yet penetrated the surface, scrub with a soft brush using a mild, non-abrasive cleaner. Cleaning frequency depends on use. Please clean and maintain your furniture regularly.

Clean all stains as quickly as possible and use the following cleaning procedure for the best results.

- Step 1:** Remove any excess spills with a damp cloth. Clean with a mild liquid soap and water mixture. Rinse with clear water and dry.
- Step 2:** Use a straight application of concentrated cleaners such as Formula 409® or Fantastik®. Rinse with clear water. Wipe with a clean cloth.
- Step 3:** For more difficult stains and disinfecting, use a 10% mixture of bleach with water. Rinse with clear water and dry. Never use bleach in full strength to clean material.

**Recommendation:** Please be sure to use a soft brush or cloth saturated with cleaning material. Always test cleaning methods on an inconspicuous area of the furniture. If stain persists, the stain probably has set. Although these materials are resistant to most common stains, some fabric dyes and ballpoint inks can create a permanent stain.

**Caution:** This information is not a guarantee and does not relieve the user from the responsibility of the proper and safe use of these materials and all cleaning agents.

\* This term and any corresponding data refer to typical performance in the tests indicated and should not be construed to imply the behavior of this or any other material under actual fire conditions.

\*\* Rate and extent of biodegradation into elements found in nature is 91% after 1,278 days under ASTM D5511 (Anaerobic Biodegradation of Plastic Materials Under High Solids Anaerobic Digestion Conditions). The test was done with the same component (PET) polyester and biocatalyst additive. No evidence of further degradation.

### Cleaning Code Definitions

W: Water-based cleaning agents or foam may be used.

WS: Clean with water-based cleaning agents, foam or pure, water-free solvents. Do not over saturate with liquid. Vacuuming or light brushing is recommended to prevent dust and soil build up.

BC: Bleach Cleanable. Clean with a 10% bleach-to-water solution. Rinse well after cleaning.
